PROJECTS

CAR RENTAL BOOKING SYSTEM

Final Year Project

This Web App was created with Reactjs, Bootstrap4 ,Material UI, HTML5, CSS, React Router, Redux, Chart js, Axios,Nodejs, Flask, Express js, Mongodb, Sqlite and with other 3rd party apis.

- It will help user to register/login and reserve, update , delete a vehicle.
- An Admin Panel was also created with admin previligies ,along with graphs.

WEB BASED IOT SYSTEM

A Web based IOT System which allow our client to add different sites according and can attach different hardwares like generator with that site and let them see the live data of hardwares including alerts and every parameter's live value with charts using Mqtt Web Sockets. Site can be access on offline map, every Site has it's own dashboard, on which our client can see all things about that site and hardwares connected to that site.

It's built using technologies like React.js, Material-UI, Re-charts, LeafLet, Mqtt Web Socket, GraphQL APIs , REST APIs and other 3rd parties.

AD CREATIVE WEB APP

It's a Web App which allow users to create ad's according to their need, which could be a story or post Ad. I worked as a Frontend developer and used technologies like Reactjs, SCSS and Typescript & other libraries.
